Subject: RE: List of glyphosate studies

Hello Jack. There were five studies identified by the CARC as usable from the Griem review, but there were some other studies JMPR reviewed that we have to look at. My understanding is that we need to at least generate one pagers for studies we haven't officially reviewed by the time of the SAP.

There are a lot of studies

Do we plan to review all of them?

I thought there were 5 cancer studies we didn't have and that was it

No,

PRD hasn't reached out yet.

Just waiting to hear what you hear.

We'll coordinate with HED and make contact with the folks that were identified.

Talked to Dan J

He said he provided the contacts...one in Asia one in Europe...to Khue

He said that those people would be the ones to release given that there may be compensation issues/and they are not Monsanto studies

He said for those in Spanish, there may or may not be translated versions

Has anyone contacted anyone?

Jack

Per our conversation yesterday, here is Khue's list of studies we don't have that relevant to the October SAP: Here is the updated list of studies we need. Strikethrough text indicates we have that study in house. Studies with red text next to them indicate we have the Spanish version, but need the English version.
